DETAILED ACTION

Response to Amendment

The Amendment, filed on June 23, 2005, has been entered and acknowledged by the Examiner.

Claims 1-17 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Abstract, pursuant to MPEP 608.01(b), the abstract has been replace in its entirety with the following paragraph,

-- A fluorescent lamp including a hermetically sealed lamp vessel, and a phosphor layer attached to a part of an inner surface of the lamp vessel, where a thickness of the phosphor layer near an edge thereof gradually and smoothly decreases towards the edge. --

Allowable Subject Matter

Claims 1-17 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of a thickness of the portion adjacent to the edge gradually and smoothly decreases towards the

edge and a thickness of the phosphor layer, except for the portion adjacent to the edge, is substantially uniform.

Regarding claims 2-6, claims 2-6 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 7, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 7, and specifically comprising the limitation of a thickness of the phosphor layer near an edge thereof gradually and smoothly decreases towards the edge, wherein the phosphor layer is formed so that a slope is created near the edge, the slope having an acute angle with respect to the part of the inner surface of the lamp vessel.

Regarding claims 8-10, claims 8-10 are allowable for the reasons given in claim 7 because of their dependency status from claim 7.

Regarding claim 11, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 11, and specifically comprising the limitation of a phosphor layer attached to a substantially entire inner surface of the external tube in a manner that an edge of the phosphor layer is positioned at an inner surface of the tubular part, a thickness of the phosphor layer near the edge gradually and smoothly decreasing towards the edge and a thickness of the phosphor layer on the spherical part being substantially uniform.

Regarding claims 12-17, claims 12-17 are allowable for the reasons given in claim 11 because of their dependency status from claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
